Uvod

Korišćeni programski jezici

Sajt je pravljen korišćenjem jezika PHP, HTML, SASS/CSS, JavaScript, jQuery, u programu Visual Studio Code.

Opis funkcionalnosti

- Na svakoj stranici se dohvataju konekcija, head, navigacioni meni i footer(podaci za oba se dohvataju iz baze). U zavisnosti od toga da li je korisnik logovan i da li je admin, ima pristup različitim stranicama.
- Slike za banner se dohvataju dinamički iz baze, kao i četiri preporučena proizvoda iz baze. Klikom na upitnik pored

dugmeta koje dodaje proizvod u korpu pojavljuje se modal sa dodatnim informacijama o svakom proizvodu.

- Na stranici contact postoji forma za kontakt, i podaci se prosleđuju bazi.
- Contact i register stranice imaju front proveru koristeći regularne izraze, isto važi i za back.
- Na stranici shop postoji mogućnost različitog filtriranja i sortiranja proizvoda klikom na taster Submit. Takođe postoji paginacija, prikazuje se po 10 proizvoda(i inicijalno i tokom filtriranja).
- Proizvodi koji se dodaju u korpu čuvaju se u Local Storage-u i na stranici Cart se prikazuju. Moguće je podešavati količinu, brisati ili jedan ili sve proizvode, što ih briše iz storage-a.
- Da bi se nastavilo sa kupovinom potrebno je ulogovati se. Ako korisnik nije ulogovan bice mu prikazana login stranica. Pre toga je neophodno da bude registrovan.
- Na account stranici se ponovo prikazuje korpa, i sa desne strane se nalazi kratka anketa. U slučaju da je korisnik već glasao, anketa se neće prikazati.
- Admin panel sadrži tabele sa podacima iz baze. Može da pregleda i briše poruke koje su stigle iz contact forme. Korisnike može da briše ili da dodaje nove, dok proizvodima može da menja određene podatke.

Template

Nije korišćen, samo je učitani bootstrap i korišćene su njegove klase.
